Notes to the Condensed Consolidated Interim Financial Statements
(Expressed in Canadian dollars - unaudited)
For the six month period ended August 31, 2013

1. NATURE OF OPERATIONS AND GOING CONCERN

Vatic Ventures Corp. (“the Company”) was incorporated under the Business Corporations Act (British Columbia) on October 30, 2007 and was classified as a Capital Pool Company as defined in the TSX Venture Exchange (“Exchange”) Policy 2.4 until January 26, 2011. On January 26, 2011, the Company completed its Qualifying Transaction (the “Transaction”) and received the final exchange bulletin for the Transaction from the Exchange. As a result, the Company’s shares are listed for trading on the Exchange under the trading symbol “VCV”.

Following the completion of the Transaction, the Company is listed as a Tier 2 mining exploration issuer. The Company operates in a single business segment focusing on mineral exploration in British Columbia, Canada and Sinaloa, Mexico. To date, the Company has not generated any revenue from its mineral exploration activities and has met its cash requirements primarily through share issuances and interest income. Until the Company attains profitability, it will be necessary to raise additional financings for general working capital and for exploration costs on its property. If the Company is unable to obtain financing in the amounts and on terms deemed acceptable, the future success of the business could be adversely affected. There is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company.

The Company’s shares are listed for trading on the TSX Venture Exchange (the “Exchange”). On September 23, 2013, the Company completed a share consolidation in which one post consolidation common share replaced eight pre-consolidation common shares (note 9). Upon Exchange approval of the share consolidation, the Company began trading on a post-consolidation basis under the symbol “VCV” on September 23, 2013. As such, all current and comparative share capital amounts have been restated to account for the 8 to 1 common share consolidation.

The head office, principal address, registered address and records office of the Company are located at 1008 Homer Street, Suite 318, Vancouver, British Columbia, Canada, V6B 2X1.

On June 20, 2012, the Company incorporated two wholly owned subsidiaries VV Mining Exploration Services Mexico S. DE. R. I. and VV Mining Mexico S. DE R. I. C. V. to carry out the exploration activities of the La Silla West claims in the State of Sinaloa, Mexico. As at February 28, 2013, the two subsidiaries were inactive. These financial statements present the consolidated operations of the Company and its subsidiaries.

As at August 31, 2013, the Company had a cumulative deficit of \$2,768,055 (February 28, 2013 - \$2,599,121) and a working capital deficiency of \$569,937 (February 28, 2013 - \$379,964). The Company expects to incur further losses in the development of its business, all of which indicate the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These condensed consolidated interim financial statements have been prepared with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company were primarily funded by the issuance of share capital. The issuance of additional equity securities by the Company may result in significant dilution to the equity interests of current shareholders. However, the Company’s future capital requirements will depend on many factors, including operating costs, the current capital market environment and global market conditions.

These condensed consolidated interim financial statements (“consolidated financial statement”) do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

The consolidated financial statements have been prepared using accounting policies consistent with those used in the Company's 2013 annual financial statements, except for income tax expense which is recognized and disclosed for the full financial year in the audited financial statements.

Approval of the financial statements

The consolidated financial statements of the Company for the six months ended August 31, 2013, were reviewed by the Audit Committee and approved and authorized for issue on October 30, 2013 by the Board of Directors of the Company.

The consolidated financial statements have been prepared on an accrual basis except for cash flow information and are based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars unless otherwise noted.

Basis of consolidation

These consolidated financial statements include the accounts and operations of the Company and its wholly owned subsidiaries, VV Mining Exploration Services Mexico S. DE. R. I. and VV Mining Mexico S. DE R. I. C. V. The two subsidiaries were incorporated in Mexico on June 20, 2012. Details of controlled entities are as follows,

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Significant accounting judgments, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, and revenue and expenses.

Significant Accounting Judgments

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the financial statement are discussed below:

1) Title to Mineral Property Interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

2) Exploration and Evaluation Expenditures

The application of the Company's accounting policy for exploration and evaluation expenditures requires judgement in determining whether it is likely that future economic benefits will flow to the Company.

If, after exploration and evaluation expenditures are capitalized, information becomes available suggesting that the carrying amount of an exploration and evaluation asset may exceed its recoverable amount the Company carries out an impairment test at the cash generating unit or group of cash generating units level in the year the new information becomes available.

Significant Accounting Estimates and Assumptions

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows.

1) Estimated Useful Lives of Assets

The estimation of the useful lives of assets has been based on historical and industry experience. Adjustments to useful life are made when considered necessary. Amortization charges are disclosed in Note 5.

2) Share-Based Payments

Equity-settled share-based awards are recognized as an expense based on their fair value at date of grant. The fair value of equity-settled share options is estimated through the use of an option valuation model – Black-Scholes, which require inputs such as the risk-free interest rate, expected dividends, expected volatility and the expected option life, and is expensed over the vesting period. Using different input estimates or models produces different option values, which would result in the recognition of a higher or lower expense.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (cont'd...)

Accounting standards, amendments and interpretations not yet effective

IFRS 9 Financial Instruments – IFRS 9 is a partial replacement of IAS 39 “Financial Instruments: Recognition and Measurement”. This new standard is effective for annual periods beginning on or after January 1, 2015. The Company is currently assessing the impact that this standard will have on the financial statements.

IAS 27 Separate Financial Statements - The amendment addresses accounting for subsidiaries, jointly controlled entities and associates in non-consolidated financial statements. The Company intends to adopt the standard beginning on March 1, 2014.

IAS 28 Investments in Associates and Joint Ventures - This amendment includes joint ventures in its scope and addresses the changes in IFRS 10-13. It deals with the requirements for separate financial statements, which have been carried over largely un-amended from IAS 27 Consolidated and Separate Financial Statements. The Company intends to adopt the standard beginning on March 1, 2014.

Amendments to IFRS 7 Disclosures – Amended IFRS requires additional disclosures on transferred financial assets.

Amendments to IAS 32 Offsetting Financial Assets and Financial Liabilities - The amendments to IAS 32 clarify certain aspects because of diversity in application of the requirements on offsetting, focused on four main areas:

- The meaning of currently has a legally enforceable right of set-off;
- The application of simultaneous realization and settlement;
- The offsetting of collateral amounts; and
- The unit of account for applying the offsetting requirement.

The Company intends to adopt the standard beginning on March 1, 2014.

11. FINANCIAL INSTRUMENTS AND RISKS

Fair values

Under IFRS, a three-level hierarchy that reflects the significance of inputs used in making fair value adjustments is required. The three levels of the fair value hierarchy are as follows:

- a) Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 – Inputs for assets or liabilities that are not based on observable market data.

The following table outlines the Company's financial assets and liabilities measured at fair value by level within the fair value hierarchy described above. Assets and liabilities are classified in entirety based on the lowest level of input that is significant to the fair value measurement.

As at August 31, 2013, there are no assets and liabilities classified to the fair value measurement.

11. FINANCIAL INSTRUMENTS AND RISKS (cont'd...)

Financial Instrument Risks (cont'd...)

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments. At August 31, 2013, the Company had a cash of \$2,570 (February 28, 2013 - \$43,649) to settle current liabilities of \$587,282 (February 28, 2013 - \$487,997). All of the Company's financial liabilities have contractual maturities of 30 days or due on demand and are subject to normal trade terms.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

Currency risk

Currency risk is the risk to the Company's earnings that arises from fluctuations of foreign exchange rates and the degree of volatility of these rates. The Company does not use derivative instruments to reduce its exposure to foreign currency risk.

There are some expenses for the Company denominated in US dollars. The Company may become exposed to currency fluctuations on mineral evaluation and exploration which are denominated in US dollars. These potential currency risks could have a significant impact on the Company.

As at August 31, 2013, the Company was exposed to currency risk through the following monetary assets and liabilities in US dollars:

Cash	\$ -
Accounts payable and accrued liabilities	(4,283)
	<u>\$ (4,283)</u>
Foreign exchange rate at August 31, 2013 - USD	1.0553

Based on the net exposures at August 31, 2013, and assuming that all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar against the US dollar would not have a significant impact on the Company's net earnings (loss).
