1. NATURE OF OPERATIONS AND GOING CONCERN

Vatic Ventures Corp. (the “Company”) was incorporated under the Business Corporations Act (British Columbia) on October 30, 2007. The Company’s shares are listed for trading under the trading symbol “VCV” on the TSX Venture Exchange (“TSX-V”). Effective April 15, 2021, the Company’s listing was transferred to New Securities Stock Exchange (NEX). The trading symbol for the Company changed from VCV to VCV.H. Effective April 22, 2022, the Company was relisted from the NEX to the TSX-V. The Company is a junior resource exploration company that is involved in the acquisition and exploration of mineral properties.

On May 4, 2021, the Company consolidated its common share on a 10:1 basis. These consolidated financial statements reflect the share consolidation retrospectively.

The head office and principal address of the Company is located at 1400 – 1040 West Georgia Street, Vancouver, British Columbia, Canada, V6E 4H1. The registered address and records office of the Company is located at 2110 – 650 West Georgia Street, Vancouver, British Columbia, Canada, V6B 4N9.

As at February 28, 2022, the Company had a deficit of \$10,778,089 (February 28, 2022 - \$10,379,056) and a working capital deficiency of \$235,371 (February 28, 2022 - \$332,538). The Company expects to incur further losses in the development of its business, all of which indicate the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These consolidated financial statements have been prepared with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The operations of the Company were primarily funded by the issuance of share capital. The issuance of additional equity securities by the Company may result in significant dilution to the equity interests of current shareholders. However, the Company’s future capital requirements will depend on many factors, including operating costs, the current capital market environment and global market conditions.

These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company’s business or ability to raise funds.

2. BASIS OF RESENTATION

Statement of compliance

The condensed consolidated financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), and interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The condensed consolidated financial statements of the Company for the period ended May 31, 2022 were reviewed by the Audit Committee and approved and authorized for issue on July 28, 2022 by the Board of Directors of the Company.

2. BASIS OF RESENTATION (cont'd...)

Basis of preparation

The consolidated financial statements have been prepared on an accrual basis except for cash flow information and are based on historical costs, modified where applicable. The financial statements are presented in Canadian dollars unless otherwise noted. Certain comparative figures have been reclassified to conform to the current period's presentation.

Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiaries. Subsidiaries are entities controlled by the Company. All inter-company transactions and balances between the Company and its subsidiaries have been eliminated upon consolidation.

The subsidiaries are consolidated from the date on which control is transferred to the Company and will cease to be consolidated from the date on which control is transferred out of the Company. The Company also assesses existence of control where it does not have more than 50% of voting power but are able to control the investee by virtue of de facto control. De facto control may arise in circumstances where the size of the group's voting rights relative to the size and dispersion of holdings of other shareholders gives the group the power to govern the financial and operating policies.

Details of the Company's subsidiaries are as follows:

	Date of Incorporation	Country of incorporation	Percentage owned May 31, 2022
VV Mining Exploration Services Mexico S. DE. R. I.	June 20, 2012	Mexico	100%
VV Mining Mexico S. DE R. I. C. V.	June 20, 2012	Mexico	100%

All inter-company transactions and balances have been eliminated upon consolidation.

10. CAPITAL DISCLOSURE

The Company considers its capital structure to include the net residual equity of all assets, less liabilities. Capital is comprised of the Company's equity and any debt that it may issue. The Company's objectives when managing capital are to (i) maintain sufficient working capital to meet current financial obligations and continue as a going concern; (ii) maintain a capital structure to allow the Company to raise equity funding to finance its capital expenditures and acquisition activities; (iii) maintain creditworthiness and maximize returns for shareholders over the long term; (iv) maintain capital above minimum regulatory levels, current financial strength rating requirements and internally determined capital guidelines and calculated risk management levels.

The Company's financial strategy is formulated and adapted according to market conditions in order to maintain a flexible capital structure that is consistent with its objectives and the risk characteristics of its underlying assets. The Company manages its capital structure and makes adjustments to it in light of changes in economic circumstances. The capital for expansion was mostly from proceeds from the issuance of common shares and debt. The net proceeds raised will be used to fund the Company's working capital. There were no changes to the way the Company manages its capital during the period ended May 31, 2022.

11. FINANCIAL INSTRUMENTS AND RISKS

Fair values

Under IFRS, a three-level hierarchy that reflects the significance of inputs used in making fair value adjustments is required. The three levels of the fair value hierarchy are as follows:

- a) Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 – Inputs for assets or liabilities that are not based on observable market data.

The Company does not have any financial assets or liabilities measured subsequently at fair value.

All financial assets and liabilities approximate their fair value due to the short term nature of these instruments.

The Company's financial instruments are exposed to certain financial risks, including credit risk, interest rate risk, market risk, liquidity risk and currency risk.

Credit risk

Credit risk is the risk of financial loss to the Company if a counter party to a financial instrument fails to meet its contractual obligation. The Company's exposure to credit risk includes cash and receivables.

The Company reduces its credit risk by maintaining its bank accounts at large international financial institutions. The Company's amounts receivable consist primarily of GST receivable due from federal government agencies, and shared office costs.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they become due. The Company's ability to continue as a going concern is dependent on management's ability to raise the required funding through future equity issuances. The Company manages its liquidity risk by forecasting cash flows from operations and anticipating any investing and financing activities. Management and the Board of Directors are actively involved in the review, planning and approval of significant expenditures and commitments.
