**MANAGEMENT'S DISCUSSION & ANALYSIS**  
**THE YEAR ENDED FEBRUARY 28, 2025**

---

**OVERVIEW**

The following management discussion and analysis ("MD&A") is a review of the operations, current financial position and outlook for Vatic Ventures Corp. (the "Company") and should be read in conjunction with the audited consolidated financial statements for the years ended February 28, 2025 and February 29, 2024, which are filed on the SEDAR+ website: [www.sedarplus.ca](http://www.sedarplus.ca).

The Company prepares its consolidated financial statements in accordance with International Financial Reporting Standards ("IFRS"). This document has been reviewed by the Audit Committee of the Board of Directors of the Company and has been approved by the Board of Directors on June 26, 2025. All amounts are expressed in Canadian dollars unless otherwise stated.

The financial information in this MD&A is derived from the Company's consolidated financial statements. This MD&A may contain forward looking statements based on assumptions and judgments of management regarding events or results that may prove to be inaccurate as a result of risk factors beyond its control. Actual results may differ materially from the expected results.

**DESCRIPTION OF THE COMPANY'S BUSINESS**

The Company was incorporated on October 30, 2007 and was classified as a Capital Pool Company ("CPC") as defined in Policy 2.4 of the TSX Venture Exchange (the "Exchange"). Until January 26, 2011, the principal business of the Company was the identification and evaluation of assets of a business and once identified or evaluated, to negotiate an acquisition of or participation in a business subject to receipt of shareholder approval, if required, and acceptance by regulatory authorities (as that term is defined in Policy 2.4).

On May 17, 2010 and further amended on January 13, 2011, the Company announced that it entered into an option agreement to acquire an undivided 100% interest in a property consisting of 14 claims, covering 7,176 hectares in the southwest of Merritt, British Columbia (see "Mineral Interests"). On January 26, 2011, the Exchange accepted the filing of the Company's Qualifying Transaction. As a result, the Company is listed on the Exchange as a Tier 2 mining exploration issuer and the common shares resumed trading on the Exchange on January 27, 2011 under the TSX Venture Exchange symbol "VCV".

On June 20, 2012, the Company incorporated two wholly owned subsidiaries VV Mining Exploration Services Mexico S. DE. R. I. and VV Mining Mexico S. DE R. I. C. V. to carry out the exploration of the La Silla West claims in the State of Sinaloa, Mexico. As at February 28, 2025, the two subsidiaries were inactive.

The Company was engaged in exploration and development of mineral properties. At this time, the Company does not own any operating mines and has no operating income from mineral production. Funding for operations is raised primarily through public and private share offerings. Future operations and the Company's ability to meet its mineral interest commitments are dependent on the Company's ability to raise sufficient funds through share offerings, debt, or operations to support current and future expenditures.

Effective April 15, 2021, the Company's listing was transferred to New Securities Stock Exchange (NEX). The trading symbol for the Company changed from VCV to VCV.H. Effective April 22, 2022, the Company was relisted from the NEX to the TSX Venture Exchange.

On May 4, 2021, the Company consolidated its common share on a 10:1 basis.

On May 14, 2024, the Company received Exchange approval to enter into a share purchase agreement with arm's length vendors (the "Optionors") to acquire a 100% interest in 1432714 B.C. Ltd., a private company ("Privco") which holds an option (the "Underlying Option") to acquire a property ("Solonópole South") from an underlying optionor (the "Underlying Optionor"). This transaction is accounted for as an asset acquisition. The Company accounts for Privco in accordance with IFRS 10, Consolidated Financial Statements.

Contingencies:

On February 28, 2023, the Company has been advised that it, along with the Optionor and CCI, has been named as defendants in a lawsuit ("Notice of Civil Claim") commenced by Mayne Minerals Inc. ("Mayne"), a private company, wherein Mayne alleges that certain mineral claims comprising part of the Sister's Mountain Property (the "Claims") were improperly staked for the benefit of the Optionor rather than for Mayne. During the year ended February 29, 2024, the Company has filed a Response to Civil Claim. In the opinion of management, the ultimate disposition of the matter is not determinable as it is too early to provide an assessment given it was recently commenced, but the Company will vigorously defend and enforce its right to purchase the Claims in good faith.

During the year ended February 28, 2025, the management had decided to write off the carrying value of the property.

**Solonópole South in Brazil**

Subsequent to the year ended February 29, 2024, the Company received Exchange approval to enter into a share purchase agreement with arm's length vendors (the "Optionors") to acquire a 100% interest in 1432714 B.C. Ltd., a private company ("Privco") which holds an option (the "Underlying Option") to acquire a property ("Solonópole South") from an underlying optionor (the "Underlying Optionor"). The parties also entered into amendments to amend the terms of the agreements.

The Company issued 6,000,000 Shares for the acquisition of Privco. These shares are subject to value escrow agreements which will result in the shares being released from escrow on the basis of 10% on Exchange approval and 15% every six months thereafter.

In accordance with the terms of the Underlying Option, Privco made payments to the Underlying Optionor of USD\$4,000 and USD\$40,000. Pursuant to the amended terms, the Company is required to make further varying annual cash payments totaling US\$400,000 and to issue an aggregate US\$400,000 worth of the Company's shares over three years.

On January 6, 2025, the Underlying Option to acquire 100% of the Solonópole South concessions was renegotiated as follows:

- a) Paying to the Underlying Optionor USD\$2,500 by January 17, 2025 (the "Purchase Price") (paid CAD\$3,691); and
- b) In addition to the Purchase Price, the Company agrees to pay the Underlying Optionor a perpetual royalty of one percent (1%) on the gross revenue derived from the sale of any minerals commercially exploited from the concessions ("Royalty"). The Company shall have the option to buy out the Royalty at any time by paying the Underlying Optionor a one-time fee of USD\$1,000,000.

**Solonópole North in Brazil**

In addition to the renegotiated Underlying Option for Solonópole South, on January 6, 2025, the Company entered into an agreement with 1434593 B.C. Ltd., a private company, which has an option agreement with the Underlying Optionor to acquire a highly prospective hard rock lithium property (the "Solonópole North Option"). As part of the proposed transaction 1434593 B.C. Ltd. will become a wholly-owned subsidiary of the Company. The proposed transaction is subject to TSXV approval, the terms of which are:

- a) Paying to the Underlying Optionor USD\$2,500 by January 17, 2025 (the "Purchase Price") (paid CAD\$3,691);
- b) Paying to a shareholder of 1434593 B.C. Ltd. acquisition and corporate costs of USD\$50,000 by March 31, 2025; and
- c) In addition to the Purchase Price, the Company agrees to pay the Underlying Optionor a perpetual royalty of one percent (1%) on the gross revenue derived from the sale of any minerals commercially exploited from the concessions ("Royalty"). The Company shall have the option to buy out the Royalty at any time by paying the Underlying Optionor a one-time fee of USD\$1,000,000.
- d) As the Company did not pay USD \$50,000 to the 1434593 B.C. Ltd. shareholder, the Company was not in compliance with its option agreement.

Each unit consists of one common share of the Company and one common share purchase warrant. Each warrant is exercisable for an additional common share of the Company at \$0.075 for a two year period. In connection with the private placement, the Company paid cash finders' fees of \$8,286 and issued 165,720 finders' warrants with a value of \$4,254. Each finders' warrant entitles the holder to purchase one common share of the Company at a price of \$0.075 for a period of 24 months. The finder's warrants were valued using the Black-Scholes model with the following inputs: expected life of 2 years, discount rate of 3.31%, volatility of 133% and dividend yield of nil. As the value per share on the private placement date was \$0.045 and was lower than the \$0.05 per unit issue price, a residual value of \$17,370 was allocated from share capital to warrant reserve.
- d) The Company issued 240,557 common shares at \$0.07 per share to settle \$16,839 of debt of the Company to an arms-length creditor, resulting in a gain on settlement of \$3,608.

During the year ended February 29, 2024:

- a) The Company issued 250,000 shares pursuant to the option agreement of Hansen Gold Property with a value of \$45,000.
- b) The Company issued 250,000 shares pursuant to the option agreement of Hansen Gold Property with a value of \$20,000.
- c) The Company issued 254,075 shares for proceeds of \$20,326 from the exercise of options.

**CRITICAL ACCOUNTING ESTIMATES**

The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Management believes the estimates are reasonable; however, actual results could differ from those estimates and could impact future results of operations and cash flows. Significant estimates made by management include the following:

1) Share-Based Payments

Equity-settled share-based awards are recognized as an expense based on their fair value at date of grant. The fair value of equity-settled share options and warrants are estimated through the use of a valuation model – Black-Scholes, which require inputs such as the risk-free interest rate, expected dividends, expected volatility and the expected option life, and is expensed over the vesting period. Using different input estimates or models produces different option values, which would result in the recognition of a higher or lower expense.

2) Economic recoverability of exploration and evaluation assets

Management has determined that exploration and evaluation costs incurred which were capitalized have future economic benefits and are economically recoverable. Management uses several criteria in its assessments of economic recoverability and probability of future economic benefits including geological and metallurgic information, history of conversion of mineral deposits to proven and probable reserves, scoping and feasibility studies, accessible facilities, existing permits and life of mine plans.

3) Income taxes

Provisions for income and other taxes are based on management's interpretation of taxation laws, which may differ from the interpretation by taxation authorities. Such differences may result in eventual tax payments differing from amounts accrued. Reported amounts for deferred tax assets and liabilities are based on management's expectation for the timing and amounts of future taxable income or loss, as well as future taxation rates. Changes to these underlying estimates may result in changes to the carrying value, if any, or deferred income tax assets and liabilities.

For a detailed summary of the Company's significant accounting policies, the reader is directed to Note 3 of the consolidated audited financial statements for the year ended February 28, 2025 available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

**RISKS AND UNCERTAINTIES**

The Company believes that the following risks and uncertainties may materially affect its success.

**Limited Operating History**

The Company is a relatively new company with limited operating history and no history of business or mining operations,

**VATIC VENTURES CORP.**  
**MANAGEMENT'S DISCUSSION & ANALYSIS**  
**THE YEAR ENDED FEBRUARY 28, 2025**

---

revenue generation or production history. The Company was incorporated on October 30, 2007 and has yet to generate a profit from its activities. The Company is subject to all of the business risks and uncertainties associated with any new business enterprise, including the risk that it will not achieve its growth objective. The Company anticipates that it may take several years to achieve positive cash flow from operations.

### **Exploration, Development and Operating Risks**

The exploration for and development of minerals involves significant risks, which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. There can be no guarantee that the estimates of quantities and qualities of minerals disclosed will be economically recoverable. With all mining operations there is uncertainty and, therefore, risk associated with operating parameters and costs resulting from the scaling up of extraction methods tested in pilot conditions. Mineral exploration is speculative in nature and there can be no assurance that any minerals discovered will result in an increase in the Company's resource base.

The Company's operations are subject to all of the hazards and risks normally encountered in the exploration, development and production of minerals. These include unusual and unexpected geological formations, rock falls, seismic activity; flooding and other conditions involved in the extraction of material, any of which could result in damage to, or destruction of, mines and other producing facilities, damage to life or property, environmental damage and possible legal liability. Although precautions to minimize risk will be taken, operations are subject to hazards that may result in environmental pollution and consequent liability that could have a material adverse impact on the business, operations and financial performance of the Company.

### **Fluctuating Mineral Prices**

The economics of mineral exploration is affected by many factors beyond the Company's control, including commodity prices, the cost of operations, variations in the grade of minerals explored and fluctuations in the market price of minerals. Depending on the price of minerals, it may be determined that it is impractical to continue the mineral exploration operation.

Mineral prices are prone to fluctuations and the marketability of minerals is affected by government regulation relating to price, royalties, allowable production and the importing and exporting of minerals, the effect of which cannot be accurately predicted. There is no assurance that a profitable market will exist for the sale of any minerals found on the Property.

### **Substantial Capital Requirements and Liquidity**

Substantial additional funds for the establishment of the Company's current and planned mining operations will be required. No assurances can be given that the Company will be able to raise the additional funding that may be required for such activities, should such funding not be fully generated from operations. Mineral prices, environmental rehabilitation or restitution, revenues, taxes, transportation costs, capital expenditures, operating expenses and geological results are all factors which will have an impact on the amount of additional capital that may be required. To meet such funding requirements, the Company may be required to undertake additional equity financing, which would be dilutive to shareholders. Debt financing, if available, may also involve restrictions on financing and operating activities. There is no assurance that additional financing will be available on terms acceptable to the Company or at all. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations or anticipated expansion, and pursue only those development plans that can be funded through cash flows generated from its existing operations.

### **Regulatory Requirements**

The current or future operations of the Company require permits from various governmental authorities, and such operations are and will be governed by laws and regulations governing exploration, development, production, taxes, labour standards, occupational health, waste disposal, toxic substances, land use, environmental protection, site safety and other matters. Companies engaged in the exploration and development of mineral properties generally experience increased costs and delays in development and other schedules as a result of the need to comply with applicable laws, regulations and permits. There can be no assurance that all permits which the Company may require for the facilities and conduct of exploration and development operations will be obtainable on reasonable terms or that such laws and regulation would not

**VATIC VENTURES CORP.**  
**MANAGEMENT'S DISCUSSION & ANALYSIS**  
**THE YEAR ENDED FEBRUARY 28, 2025**

---

have an adverse effect on any exploration and development project which the Company might undertake.

Failure to comply with applicable laws, regulations and permitting requirements may result in enforcement actions, including orders issued by regulatory or judicial authorities causing operations to cease or be curtailed, and may include corrective measures requiring capital expenditures, installation of additional equipment or remedial actions. Parties engaged in exploration and development operations may be required to compensate those suffering loss or damage by reason of the exploration and development activities and may have civil or criminal fines or penalties imposed upon them for violation of applicable laws or regulations. Amendments to current laws, regulation and permits governing operations and activities of mineral companies, or more stringent implementation thereof, could have a material adverse impact on the Company and cause increases in capital expenditures or exploration and development costs or require abandonment or delays in the development of new properties.

**Financing Risks and Dilution to Shareholders**

The Company will have limited financial resources, no operations and no revenues. If the Company's exploration program on its properties is successful, additional funds will be required for the purposes of further exploration and development. There can be no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be available on favourable terms or at all. It is likely such additional capital will be raised through the issuance of additional equity, which will result in dilution to the Company's shareholders.

**Title to Properties**

Acquisition of title to mineral properties is a very detailed and time-consuming process. Title to, and the area of, mineral properties may be disputed. The Company cannot give an assurance that title to the Property will not be challenged or impugned. Mineral properties sometimes contain claims or transfer histories that examiners cannot verify. A successful claim that the Company, as the case may be, does not have title to the properties could cause the Company to lose any rights to explore, develop and mine any minerals on that property, without compensation for its prior expenditures relating to such property.

**Requirement for Permits and Licenses**

As the Company holds an option to acquire the properties, subject to the NSR and it and may need to acquire further permits or licenses necessary to carry on proposed exploration activities on the properties. A substantial number of permits and licenses may be required should the Company proceed beyond exploration; such licenses and permits may be difficult to obtain and may be subject to changes in regulations and in various operational circumstances. It is uncertain whether the Company will be able to obtain all such licenses and permits.

**Competition**

There is competition within the mining industry for the discovery and acquisition of properties considered to have commercial potential. The Company will compete with other mining companies, many of which have greater financial, technical and other resources than the Company, for, among other things, the acquisition of minerals claims, leases and other mineral interests as well as for the recruitment and retention of qualified employees and other personnel.

**Reliance on Management and Dependence on Key Personnel**

The success of the Company will be largely dependent upon on the performance of the directors and officers and the ability to attract and retain key personnel. The loss of the services of these persons may have a material adverse effect on the Company's business and prospects. The Company will compete with numerous other companies for the recruitment and retention of qualified employees and contractors. There is no assurance that the Company can maintain the service of its directors and officers or other qualified personnel required to operate its business. Failure to do so could have a material adverse effect on the Company and its prospects.

### **No Mineral Reserves or Mineral Resources**

The property in which the Company holds an interest is considered to be an early exploration stage property, however no mineral reserve or mineral resource estimates have been prepared in respect of the property. Mineral reserves are, in the large part, estimates and no assurance can be given that the anticipated tonnages and grades will be achieved or that the indicated level of recovery will be realized. Reserve estimates for properties that have not yet commenced production may require revision based on actual production experience. Market price fluctuations of metals, as well as increased production costs or reduced recovery rates, may render mineral reserves containing relatively lower grades of mineralization uneconomic and may ultimately result in a restatement of reserves. Moreover, short-term operating factors relating to the mineral reserves, such as the need for orderly development of the ore bodies and the processing of new or different mineral grades, may cause a mining operation to be unprofitable in any particular accounting period.

### **Environmental Risks**

The Company's exploration and appraisal programs will, in general, be subject to approval by regulatory bodies. Additionally, all phases of the mining business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of international conventions and federal, provincial and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with mining operations. The legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

### **Governmental Regulations and Processing Licenses and Permits**

The activities of the Company are subject to Canadian, provincial and Thailand approvals, various laws governing prospecting, development, land resumptions, production taxes, labour standards and occupational health, mine safety, toxic substances and other matters. Although the Company believes that its activities are currently carried out in accordance with all applicable rules and regulations, no assurance can be given that new rules and regulations will not be enacted or that existing rules and regulations will not be applied in a manner which could limit or curtail production or development. Amendments to current laws and regulations governing operations and activities of exploration and mining, or more stringent implementation thereof, could have a material adverse impact on the business, operations and financial performance of the Company. Further, the mining licenses and permits issued in respect of its projects may be subject to conditions which, if not satisfied, may lead to the revocation of such licenses. In the event of revocation, the value of the Company's investments in such projects may decline.

### **Local Resident Concerns**

Apart from ordinary environmental issues, work on, or the development and mining of the properties could be subject to resistance from local residents that could either prevent or delay exploration and development of the properties.

### **Conflicts of Interest**

Certain of the directors and officers of the Company will be engaged in, and will continue to engage in, other business activities on their own behalf and on behalf of other companies (including mineral resource companies) and, as a result of these and other activities, such directors and officers of the Company may become subject to conflicts of interest. The British Columbia Business Corporations Act ("BCBCA") provides that in the event that a director has a material interest in a contract or proposed contract or agreement that is material to the issuer, the director must disclose his interest in such contract or agreement and refrain from voting on any matter in respect of such contract or agreement, subject to and in accordance with the BCBCA. To the extent that conflicts of interest arise, such conflicts will be resolved in accordance with the provisions of the BCBCA.

MANAGEMENT'S DISCUSSION & ANALYSIS  
THE YEAR ENDED FEBRUARY 28, 2025**

---

**Uninsurable Risks**

Exploration, development and production operations on mineral properties involve numerous risks, including unexpected or unusual geological operating conditions, rock bursts, cave-ins, fires, floods, earthquakes and other environmental occurrences. It is not always possible to obtain insurance against all such risks and the Company may decide not to insure against certain risks as a result of high premiums or other reasons. Should such liabilities arise, they could have an adverse impact on the Company's results of operations and financial condition and could cause a decline in the value of the Company shares. The Company does not intend to maintain insurance against environmental risks.

**Litigation**

The Company and/or its directors may be subject to a variety of civil or other legal proceedings, with or without merit.

**Dividends**

To date, the Company has not paid any dividends on its outstanding shares. Any decision to pay dividends on the shares of the Company will be made by its board of directors on the basis of the Company's earnings, financial requirements and other conditions.

**FORWARD-LOOKING STATEMENTS**

This MD&A contains forward-looking statements. Forward-looking statements are projections of events, revenues, income, future economic performance or management's plans and objectives for future operations. In some cases, you can identify forward-looking statements by the use of terminology such as "may", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of these terms or other comparable terminology. Examples of forward-looking statements made in this MD&A include statements about the Company's business plans; the costs and timing of its developments; its future investments and allocation of capital resources; success of exploration activities; requirements for additional capital; government regulation of mining operations. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including: general economic and business conditions, fluctuations in worldwide prices and demand for minerals; our lack of operating history; the actual results of current exploration activities; conclusions or economic evaluations; changes in project parameters as plans continue to be refined; possible variations in grade and or recovery rates; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes or other risks of the mining industry; delays in obtaining government approvals or financing or incompletion of development or construction activities, any of which may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

While these forward-looking statements and any assumptions upon which they are based are made in good faith and reflect our current judgment regarding the direction of the Company's business, actual results will almost always vary, sometimes materially, from any estimates, predictions, projections, assumptions or other future performance suggested herein. Except as required by applicable law, including the securities laws of Canada, the Company does not intend to update any of the forward-looking statements to conform these statements to actual results.

**CHANGES IN ACCOUNTING POLICIES**

**New Accounting Pronouncements**

The Company adopted the following new IFRS standard effective for annual periods beginning on or after January 1, 2024. The nature and impact of the standard on the Company's consolidated annual audited financial statements is indicated below.

In February 2021, the IASB issued Disclosure of Accounting Policies (amendments to IAS 1 and IFRS Practice Statement 2 Making Materiality Judgements). IAS 1 is amended to require that an entity discloses its material accounting policies, instead of its significant accounting policies. Further amendments explain how an entity can identify a material accounting

MANAGEMENT'S DISCUSSION & ANALYSIS  
THE YEAR ENDED FEBRUARY 28, 2025**

---

policy and clarify that information may be material because of its nature, even if the related amounts are immaterial. These amendments have not had a material impact on the Company's annual consolidated financial statements.

Issued but not yet effective In April 2024, the IASB issued a new IFRS accounting standard to improve the reporting of financial performance. IFRS 18 Presentation and Disclosure in Financial Statements replaces IAS 1 Presentation of Financial Statements. The standard will become effective January 1, 2027, with early adoption permitted. The Company is in the process of assessing the impact of this new standard on the Company's financial statements.

### **FINANCIAL AND OTHER INSTRUMENTS**

Under IFRS, a three-level hierarchy that reflects the significance of inputs used in making fair value adjustments is required. The three levels of the fair value hierarchy are as follows:

- a) Level 1 – Unadjusted quoted prices in active markets for identical assets or liabilities;
- b) Level 2 – Inputs other than quoted prices that are observable for assets or liabilities, either directly or indirectly; and
- c) Level 3 – Inputs for assets or liabilities that are not based on observable market data.

The Company does not have any financial assets or liabilities measured subsequently at fair value.

The fair values of cash, amounts receivable, due from related parties and accounts payable and accrued liabilities approximate the carrying values due to short term to maturity. The fair value of the Company's non-current loans payable approximates the carrying values and contractual interest rates are comparable to current market interest rates.

### **OTHER MATTERS**

#### **Legal proceedings**

On February 28, 2023, the Company has been advised that it, along with the Optionor and CCI, has been named as defendants in a lawsuit ("Notice of Civil Claim") commenced by Mayne Minerals Inc. ("Mayne"), a private company, wherein Mayne alleges that certain mineral claims comprising part of the Sister's Mountain Property (the "Claims") were improperly staked for the benefit of the Optionor rather than for Mayne. During the year ended February 29, 2024, the Company has filed a Response to Civil Claim. In the opinion of management, the ultimate disposition of the matter is not determinable as it is too early to provide an assessment given it was recently commenced, but the Company will vigorously defend and enforce its right to purchase the Claims in good faith. As of the date of this MD&A, the Company does not have an update on the Civil Claim.

#### **Contingent liabilities**

At the date of report, management is unaware of any outstanding contingent liability relating to the Company's activities, other than the Notice of Civil Claim discussed above.

### **OFFICERS AND DIRECTORS**

Current directors and officers of the Company are as follows:

Loren Currie, CEO, Corporate Secretary, and Chairman  
Anthony Clements, Director  
Thomas Wilson, Director  
Pieter Bakker, Interim Chief Financial Officer

### **OUTLOOK**

The Company's primary focus for the foreseeable future will be on reviewing its financial position, and continuing exploration and development activities on its mineral properties.
